

Format for Paper summary

- a. Critical summary of Paper
- 3. Method (How you did approach/ address the research problem)
 - a. Participants (Sampling techniques, description of the participants, e.g. Age, Handedness, Socio-economic level etc.)
 - b. Design
 - c. Task (Description of the nature of the task)
 - d. Procedure (Description of the procedure/ protocol of the experiment/study)
 - e. Measure of the Performance
- 4. Results (What was found)
 - a. Description of the scope of the analysis
 - b. Data representation (e.g. Figure, table, graph etc.)
- 5. Discussion (Finding the possible ways of explaining the observed behaviour)
 - a. How the current results contribute to knowledge in the field?
 - b. Compare the current results to the literature

Deadline : 12th September, 2018 on moodle.

Format for Project Presentation

1. Introduction

- a. Background
- b. Motivation (Why the current project is important)
- c. Objectives (Specific goals of the current project)

2. Literature Review (Be Brief, full literature review should be submitted as paper summary on 12th September 2018 on moodle.)

- a. Critical summary of Paper
- 3. Method (How you did approach/ address the research problem)
 - a. Participants (Sampling techniques, description of the participants, e.g. Age, Handedness, Socio-economic level etc.)
 - b. Design
 - c. Task (Description of the nature of the task)
 - d. Procedure (Description of the procedure/ protocol of the experiment/study)

e. Measure of the Performance

4. Results (What was found)

a. Description of the scope of the analysis

b. Data representation (e.g. Figure, table, graph etc.)

5. Discussion (Finding the possible ways of explaining the observed behaviour)

a. How the current results contribute to knowledge in the field?

b. Compare the current results to the literature

6. Conclusions

a. Major findings of the current project/work

b. Important implications of the current findings

c. Limitation of the current work

7. References

Examples: Srivastava P., Sahu A., Singhal, P., Shukla A. & Agarwal, A. (2016). Unified Theory of Mental Representation and Abstract Concept. Trends in Cognitive Sciences, Pg. 47 – 57, vol. 53.

8. Citations:

a. Srivastava and colleagues (2016) found that ; Or

b. A study report that ... (Srivastava, Sahu, Singhal, Shukla and Agarwal, 2016).

Or

d. It has been observed that ... (Srivastava, Sahu, Singhal, Shukla and Agarwal, 2016).

9. Factors of Evaluation:

- Clarity

- o Research problem and Hypothesis

- o Methodology – Design, Participants details, task and measure of the performance

- o Result and conclusion

- Organization of the report as well as the presentation

- Overall Impact

- Group effort

PLAGIARISM IS NOT ALLOWED!

DEADLINES:

Summary of papers submission: 12th September, 2018

Brief presentation (In class): 29th September, 2018 : 10 minutes total, 8 mins presentation, 2 mins QnA.

Teams of 2 or 3, forms for teams will be circulated separately.
